
Carousel Style question

Posted by cealocanth - 2017/08/11 11:46

Hi There, I would like the images in the rear of the carousel (ie. all images except for the front main image) to have a slight opacity so that they seem to fade into the background. Is there a styling or adjustment to code that I could do to enable this.

Thanks!! :)

Hello,

Add the following CSS rule to "CSS Styles" parameter in module settings:

```
.ari-cloud-carousel IMG:not(.active) {opacity:0.3}
```

Regards,
ARI Soft

This solved the problem, thank you :)

I worked it out a different way, but your's is far neater. I did mine like this:

```
img.cloudcarousel {  
  
    -webkit-filter: grayscale(20%)  
        brightness(60%)  
        contrast(100%);  
    filter: grayscale(20%)  
        brightness(60%)  
        contrast(100%);  
  
    transition: filter 0.3s;  
    -webkit-transition: filter 0.3s, -webkit-filter 0.3s;  
}  
img.cloudcarousel.active {  
  
    opacity: 1;  
    box-shadow: none;  
    -webkit-filter:none;  
  
    transition: none;  
    -webkit-transition: none;  
}
```
