Please Help!
Posted by subsee - 2010/08/03 13:55

_____

Just installed this module but can't seem to display images and keep getting an error saying "JFolder::files: Path is not a folder:" can anyone shed any light on this for me or maybe do a print screen of there own module settings so I can check the setup process has been done correctly? Thanks in advance for any help. :)

_____

Hello,

It seems you have set incorrect value for 'Image path' parameter. Could you say what value you use for this parameter?

Regards,
ARI Soft

_____

No, 'ARI Cloud Carousel' is 3D carousel. It can't work in flat mode like on 'Big Brother' site.

Re:Please Help!

i'm using images/stories/images/file.jpg and in that same folder is the .ini file.

_____

Type in this parameter path to folder with images, not to one image. In you case type images/stories/images value in this parameter.

Regards,
ARI Soft

Hi. i have the same problem. I've instaled the module and i don't know how to write in the path in right way. In text area I have wrote in "images/stories/slides/name-of-image.gif" and also tried "images/stories/slides/name-of-image.gif" and there is no reaction. How to do this?

_____

Hello,

The module shows all images from folder(s). Specify path to necessary folder(s) not path to single image. For example, if you want to show images from /images/stories/food folder, enter the following value in 'Image path' parameter:

images/stories/food
