
Carousel and Menu Conflict

Posted by jmil - 2017/08/23 16:30

Some of our Menus extend into the Cloud Carousel Position and the Carousel is in front of the Menu. Saw a couple similar posts for z-index fixes but did not clear it. Any way to put the carousel BEHIND the menu when it drops down??

See link here and select any main menu above to see the issue:

Hello,

Add the following CSS rule to "CSS Styles" parameter in module settings:

```
BODY #middle {z-index:9}
```

Regards,
ARI Soft
