
copy or change location of mod_aricloudcarousel

Posted by jason - 2010/08/12 00:38

Hi, WHen I change the location of module or copy the module and use in 2 location, it does not animate? Can you help?
Thank you

Hello,

Open 'Extensions -> Module Manager' page, choose necessary module in modules data grid and click 'Copy' button.
Joomla! creates copy of selected module.

Regards,
ARI Soft
