## aricloudcarousel.ini is not working for me

Posted by brandonaaws - 2018/09/12 16:38

---

Hi,

I am facing issue with having the aricloudcarousel.ini working on my site. I have gone through the forum post and have taken care of

#1 parse\_ini\_file is removed from disable\_functions from server php.ini

#2 I have set the aricloudcarousel.ini

BLACK-SUV.jpg="Get Me an SUV"

BLACK-SUV.jpg="Get Me an SUV"

BLACK-SUV.jpg="http://www.google.com"

This BLACK-SUV.jpg is loading on site. But not the description

#3 aricloudcarousel.ini is there where it is by default  
/home/cpanel\_users/public\_html/modules/mod\_aricloudcarousel folder

What I am missing here.

Hello,

INI file should be located in folder with images. If it doesn't help, could you provide a link to a page where the problem occurs? You can send it by email.

Hello,

Titles and descriptions are not shown because parse\_ini\_file PHP function is disabled on your server. The following warning appears:

parse\_ini\_file() has been disabled for security reasons

If it is not possible to enable the function, "ARI Cloud Carousel PRO" can work without parse\_ini\_file.

Regards,  
ARI Soft
