
Simple inquiry - active image

Posted by sunrize - 2010/08/30 11:07

I love this extension, Thank you soooo much, great work...

I was wondering if it possible to show the first active image to have a border, and when going to the next with the nav it gives the next image a border... and so on

And is it also possible to show all the titles and discription in a list and when hovered over either the image or title they both give hover effect, either background change or a border around the itme.

I'm not really a wiz in Java, i've played around with the css and managed to get the hover effect i wanted when hovering over the image only.

Your help would be appreciated.

Thank you again for your great work keep it up!!!

Hello,

We have updated the module, download and upgrade it, please. After this you can use the following CSS rule that create border around selected carousel image:

```
.ari-cloud-carousel IMG.active
{
    border: 1px solid gray;
}
```

Regarding the second requirement about title list, it requires additional coding.

Regards,
ARI Soft

I tried that code but it did not work.

I tried the following three and none worked

```
.ari-cloud-carousel IMG.active, .cloudcarousel IMG.active, IMG.active{border:1px solid red;}
```

I even tried these two and that didnt work either

```
img.cloudcarousel:active, img.ari-cloud-carousel:active {border:1px solid red;}
```

Provide link to page, please, where we can see this issue?

PS: BTW, try to clean a browser cache.

Regards,
ARI Soft

Thank you for the quick reply

I've cleaned my browser cache and my joomla admin cache

Here is the link I'm working on

http://www.apexmedicaljo.com/index.php?option=com_content&view=article&id=6&Itemid=7

I was trying to make it look a bit similar to this link

<http://www.almalasers.com/products.jsp>

Old version of the module is installed on your site. The latest version of the extension is 1.1.2, but 1.1.1 is installed on your site. Download the latest version from this page and upgrade it on your site, please.

Thank you so much for your great help....I thought i had the updated version since i downloaded this extension last week on wed.

Now i just need to figure out the listing of all the titles and the hover effect

Thanks again you have been an angel :)
