## How to display an article without the template

Posted by dgsa82 - 2010/09/22 22:25

---

Hi, i'm trying to use this extension in a page under development.

I want that when click in a image it displays a lightbox with an article in it, but this article needs to be show whitout the template. Only the article itself.

Don't know if its a problem with the link in the .ini file or what...

On the link section of the ini file i have image.jpg=index.php?option=com\_content&view=article&id=257

With that link the lightbox displays the page where i have the module, not the one in the link

You can see the problem in here

I'm using the joomla core lightbox

Thanks

Hello,

Use the following link:

[index.php?option=com\\_content&view=article&id=257&tmpl=component](index.php?option=com_content&view=article&id=257&tmpl=component)

instead of:

[index.php?option=com\\_content&view=article&id=257](index.php?option=com_content&view=article&id=257)

In other words add "tmpl=component" variable to link. If Joomla! find this variable in a request it loads a page without template layout.

Regards,  
ARI Soft

---

i change the link as you recomendad, but still opens a diferent article and still use the template. Already clean the cache and put the same link on all de images, but in some open the image in the lightbox and in others open the wrong link.

These is the .ini file im using:

ao-profamilia.jpg=AO Profamilia

cyclofem.jpg=Cyclofem

depo-provera.jpg=Inyectable Trimestral

postinor.jpg=AnticoncepciÑfn de Emergencia

---

ao-profamilia.jpg=Con PrescripciÑfn MĐ¹dica

cyclofem.jpg=AnticoncepciÑfn hormonal inyectable mensual

depo-provera.jpg=Medicamento Inyectable cada 3 meses que previene el embarazo.

postinor.jpg=Pildora del dĐ½a despues

ao-profamilia.jpg=index.php?option=com\_content&view=article&id=257&tmpl=component

cyclofem.jpg=index.php?option=com\_content&view=article&id=257&tmpl=component

depo-provera.jpg=index.php?option=com\_content&view=article&id=257&tmpl=component

postinor.jpg=index.php?option=com\_content&view=article&id=257&tmpl=component

Please help.

you can see the problem here

Thanks

Problem solved, i wasnÒ't using the " before and after everi title, description and link so the correocr syntax is  
image.jpg="name"

Thanks any way
