Module Class Suffix

Posted by rtdesign - 2010/09/29 04:55
_____

I wish the module to be displayed without the border - in the template I am using i normally just add the module suffix parameter 'blank' and it shows without the border - how can I do this for the ARI Cloud Carousel, since it has no option for module suffix?

Hello,

Download and upgrade 'ARI Cloud Carousel' module. New version provides ability to specify module class suffix.

Regards,
ARI Soft

Excellent _ I hacked the XML file earlier - and was amazed that it worked!
