Change Template

Posted by Zilvermeeuw - 2010/10/16 08:48

_____

Hi Ari,

I want to change the template of the Ari Cloud Carousel.

I can edit the file tmpl/default.php. But a better solution would be to create a new file (ex: tmpl/droomdecor.php) where I can change it.

But how to select the new file?

_____

Hello,

Joomla! provides possibility to override extensions templates on site template level. For this create necessary template file by the following path:

/templates//html/mod_aricloudcarousel/default.php

Regards,
ARI Soft

Thanks!

It's so easy....

You just have to know it!
