
Hide description in carousel but SHOW in lightbox?

Posted by HarryWales - 2010/10/21 10:39

I really LOVE this extension.

BUT - I would like to know if there is ANY way I can hide both the Title and Description in the Carousel itself, but then SHOW the Description in the lightbox image?

Is there a tweak for this?
Could it be done using CSS?

Basically I want visitors to see the images Carousel with NO titles or descriptions, so they can then choose the thumbnail that "inspires" them, click it,, and then when it opens in the lightbox they get to see the description I have set for it.

Possible?

Why not :) Add the following CSS rules to 'CSS Styles' parameter in module settings:

```
{ $id }_wrapper .ari-cloud-carousel-title,  
{ $id }_wrapper .ari-cloud-carousel-alt  
{  
    display: none !important;  
}
```

Regards,
ARI Soft
