## Linking images to specific URL

Posted by MatrixDonna - 2010/10/28 14:44

---

Hi there,

Could someone pls point me out to a thread that discusses linking each image in the carousel to a specific URL??

I read this:

"Supports possibility to show images titles, descriptions and define redirect links which you can define in INI file" but not sure where the INI is located.

Kind Regards

=====

---

Hello,

See sample INI file which is located by the following path:

/modules/mod\_aricloudcarousel/aricloudcarousel.ini

Link to this file can be found in 'Description' field on module settings page.

Thank you so much for replying!! When looking in my files it doesn't have an .ini extension thats why I cudn't find it. For anyone else that gets stuck, this picture shows the selected file:

<http://www.ari-soft.com/images/fbfiles/images/LINKTHIS.jpg>

Hi again,

I adjusted my .ini file to be the following (some samples, i do have have more items listed) and its not working for some reason.. am I supposed to do something different?:

cash4phones.jpg="Cash4Phones"  
Cogmo\_fin.jpg="Cogmo"

cash4phones.jpg="Cash4Phones"  
Cogmo\_fin.jpg="Cogmo"

cash4phones.jpg="http://www.cash4phones.co.za/"  
Cogmo\_fin.jpg="http://www.cogmo.ch/"

Do you place the file to folder with images? You can find this information in help with is located in "Description" field on module settings page:

Hi,

I have a problem with having URL  
linked to my photos that I put  
in the joomla catalogue:  
images/stories/icons/

This is how my ini file looks like:

```
china.jpg="china"  
news.jpg="news"
```

```
china.jpg="china"  
news.jpg="news"
```

```
china.jpg="http://www.google.com"  
news.jpg="http://www.onet.pl"
```

and in images/stories/icons  
i have 2 jpg files: china and news

I put ini file in the fotos catalogue  
in joomla.

and i can not still have working  
URL when i click on the fotos on the page

Can u tell me where i have done mistake?

Hello,

---

Could you provide link to page where we can see the issue and screenshot of the page with module settings or temporary access to your Joomla! backend by email that we can investigate this issue?

Regards,  
ARI Soft

## Re:Linking images to specific URL

Posted by admin - 2010/11/02 06:36

/images/storied/icons/ didn't contain aricloudcarousel.ini file. We added it and now the module uses links and shows titles and descriptions.

## Re:Linking images to specific URL

Posted by Jadee77 - 2011/06/27 03:29

I am also trying to get the images to link to pages on the site. I tried creating the ini file as shown in the example but the links are only going to the image and not to the html page. Also no titles show up. Am I doing something wrong Here's the copy of my ini file:

```
images/kids-books-2/book-dare-to-dream.png="Dare to Dream"
images/kids-books-2/book-hot-issues-cool-choices.png="Hot Issues, Cool Choices"
images/kids-books-2/book-if-you-had-to-choose.png="If You Had to Choose, What Would You Do"
images/kids-books-2/book-keepin-it-real.png="Keepin' It Real"
images/kids-books-2/book-its-up-to-you.png="It's Up to You, What Do You Do"
images/kids-books-2/book-me-myself-i.png="Me, Myself and I"
images/kids-books-2/book-they-stood-alone.png="They Stood Alone"
images/kids-books-2/book-more-if-you-choose.png="More If You Had to Choose, What Would You Do"
```

```
images/kids-books-2/book-dare-to-dream.png=""
images/kids-books-2/book-hot-issues-cool-choices.png=""
images/kids-books-2/book-if-you-had-to-choose.png=""
images/kids-books-2/book-keepin-it-real.png=""
images/kids-books-2/book-its-up-to-you.png=""
images/kids-books-2/book-me-myself-i.png=""
images/kids-books-2/book-they-stood-alone.png=""
images/kids-books-2/book-more-if-you-choose.png=""
```

```
images/kids-books-2/book-dare-to-dream.png="kids-books/dare-to-dream.html"
images/kids-books-2/book-hot-issues-cool-choices.png="kids-books/hot-issues-cool-choices.html"
images/kids-books-2/book-if-you-had-to-choose.png="kids-books/if-you-had-to-choose-book.html"
images/kids-books-2/book-keepin-it-real.png="kids-books/keepin-it-real.html"
images/kids-books-2/book-its-up-to-you.png="kids-books/its-up-to-you-book.html"
images/kids-books-2/book-me-myself-i.png="kids-books/me-myself-and-i.html"
images/kids-books-2/book-they-stood-alone.png="kids-books/they-stood-alone.html"
images/kids-books-2/book-more-if-you-choose.png="kids-books/more-if-you-had-to-choose-book.html"
```

---

## Re:Linking images to specific URL

Posted by admin - 2011/06/27 06:58

Hello,

---

INI file should be located in folder with image, in your case this is /images/kids-books-2/ folder. Content of INI file should look like:

```
book-dare-to-dream.png="Dare to Dream"
book-hot-issues-cool-choices.png="Hot Issues, Cool Choices"

book-dare-to-dream.png="kids-books/dare-to-dream.html"
book-hot-issues-cool-choices.png="kids-books/hot-issues-cool-choices.html"
```

PS: One note, file names are case-insensitive.

Regards,  
ARI Soft

## Re:Linking images to specific URL

Posted by Jadee77 - 2011/06/27 12:34

I removed the 'description' portion of the ini file since I'm not using that (as shown in your example) and it still doesn't work. And yes, the file has been located in the correct folder this whole time. What I am seeing is that instead of linking to the html page, it is just opening up a page with the image (even though the 'link' points to the html page).

Any ideas?

Thanks in advance.

Oh wait, I had not removed the image path. So it's working now. Thanks.
