Textbox beneath module
Posted by bernd - 2010/10/29 16:27
_____

I would like to have the possibility of a textbox, maximum width of the module, beneath the module, changing with every new front picture. This would be great!

Hello,

What textbox you mean? The module can display title and description of selected image.

Regards,
ARI Soft

Hi,
I would like to have some place to write more than 2 sentences. Let's say for a small explanation of the behaviour of an animal or something like this. Perhaps a pictures can show you what I mean. http://www.ari-soft.com/images/fbfiles/images/Example.gif

_____

It can be done if you add to "CSS Styles" parameter in module settings the next code:

```
{$id}_wrapper
{
  margin-bottom: 90px;
}

{$id}_wrapper DIV.ari-cloud-carousel-caption
{
  top: 100%;
  margin-top: 15px;
}
```

It can require to play with value of "margin-bottom" property that adapt it to your layout.

Regards,
ARI Soft

Many thanks for rapidly answering me! I like this extension very much, because it works and looks excellent and the support is great too. Some time ago I asked you, how to change the background and now this possibility is given in the module itself. Great! Well letâ€™s talk about my newest wish. I tried out your advice and it works, but this is not really what I

dreamed of. Could you please leave title, description, header and footer untouched - they couldnâ€™t be much better - and give an additional opportunity for adding some text, changing with every new picture in the front position of the carousel. The text should only be seen underneath the carousel! Sorry for my german English!
Regards
Bernd

_____

I have tried this on 2 pages. On 1 it works but on the other it doesnt work. Any idea what could be the problem?
this is the page that does not work

_____

Set "Show title" and "Show description" parameters to "Yes".

Regards,
ARI Soft
