
Carousel in one article

Posted by flyingman - 2010/11/05 18:02

Hi,

How can I put (to call) the module only inside one special article or different copied modules in different articles?

Thanks.

i put in article the code:

```
{aricloudcarousel moduleid="53"}
```

and its not working.

and what i need to set in module details Position ?

=====

Re:Carousel in one article

Posted by admin - 2010/11/06 17:29

Correct the code please. It should look like:

```
{aricloudcarousel moduleId="53"}
```

In other words use "moduleId" parameter instead of "moduleid". Check also that module and plugin are enabled.

Hi,

I've well installed the plugin and module.
I would like to display the carousel in an article. Unfortunately nothing happen. I put the photos for the carousel in the

folder images/stories/cloudcarousel

I wrote this in the article:

```
{aricloudcarousel moduleId="29"}
```

Here are the module's parameters:

Would you have an explanation for this problem ?

Many thanks in advance.

Provide link to page where we can see this issue and temporary access to your Joomla! backend by email that we can investigate this issue and provide solution.

PS: It seems Joomla! installer couldn't install module language files correctly, because /language/en-GB folder doesn't have writable permissions or this folder doesn't exist. It can occur problem with other Joomla! extension which are used standard Joomla! internalization approach.
