
Carousel vertical inserted

Posted by KTA - 2010/12/05 05:42

Hello!

How can I set the carousel vertically? Where can I find the appropriate cod?

Thank you!

Sincerely

=====

Hello,

Could you explain what do you want to show in vertical direction? Change navigation buttons position?

Regards,
ARI Soft

Hello!

The rotation of the carousel will not be horizontal but vertical.
So, the images should not turn from right to left but rotate from top to bottom or from bottom to top.

Thank you!

The module doesn't provide this ability. The extension is based on Cloud Carousel jQuery widget and you can extend it for your needs.
