Viewing problem

Posted by Danny91184 - 2010/12/21 18:20

_____

Hello,

I've installed the ARI Cloud Carousel, and it works.
But when I put it in articles, the viewing is not correct.

I've fixed it once, but in a accident I've deleted some things, so I started over. But now I can't get the carousel in the center of an article.

How can I do that? (is there a manual for that?)

And my second question is; if I click on a thumbnail, the picture gets bigger, but does the carousel pay attention to the screen size the user has?

I hope to hear soon if someone can help me.

With regards, Danny

_____

Hello,

The module is centered in a content by default but this behaviour can be changed by site templates styles. Could you provide link to page where we can see the module on your site? It helps us to provide an answer for the first question. About the second question, could you explain it in more details?

Regards,
ARI Soft

_____

Hello,

I have an standard template which is provided with Joomla.
Here is my example:

http://dannylammers.net/index.php?option=com_content&view=article&id=50&Itemid=62

I will try to explain my second question.
Person 1 has an screen resolution of 1024x768 on an old screen.
Person 2 has an screen resolution of 1920x1080.

The pictures that I have are quite big (sizes of 6mb per photo). When they click on the photo, does the module recognize the screensize, so the automaticly will be "resized" on screen?

Thanks for all the fast help so far.

With regards,

Danny

_____

When we open provided link in a browser, the carousel is centered:

http://www.ari-soft.com/images/fbfiles/images/carousel.jpg

About auto-resize, if you want to adapt image in a lightbox to screen resolution, it can be done by the following extensions:

ARI Sexy Lightbox

ARI Fancybox

ARI Colorbox

ARI Pretty Photo

If one of these extensions is used with "ARI Cloud Carousel", large image in lightbox will be fitted to screen size.

Regards,
ARI Soft

Hmm that's strange. Yesterday it was different.. Even on 1024x768 it works fine now.
Thanks :laugh:

But now I come to a little bit of a problem.
When I look at my website at the carousel at the section 'Motorshow Essen 2010'.
With 200 photos the carousel isn't great to look at.

When I look to your example image gallery in the 'ARI Sexy Lightbox' module, that's nice to look at.
Even with 200 photos it's still nice to have a nice overview.
And when I click it adapt the image to screen resolution.

That's more the way I want to show my photos..
So, besides the ARI Sexy Lightbox, what do I need to get that kind of image gallery?
Is that a module also?   :blush:

Again; thanks for all the great help and info!

Regards,

Danny

_____

"ARI Sexy Lightbox" contains module and 4 plugins. The module provides user-friendly interface for configuring gallery and lightbox parameters. The module can be loaded into any content with help "System - ARI Sexy Lightbox Anywhere" or gallery can be placed into any content with help this plugin.

_____

OK great, so if I understand well, I buy the ARI Sexy Lightbox and I can make a gallery like your example gallery?

Then I'm gonna buy that in about a few minutes :lol:

_____

Great. I've ordered and paid it   :laugh: :laugh:
So I hope it all will be soon in my mail, so I can make a gallery like yours.

Is there a howto available, or a manual?

_____

Download arisexylightbox_unzip_first.zip archive in "Member Area" on our site. Unzip and read readme.txt file please. After this install "ARI Sexy Lightbox" module, tutorial how to use it can be found in "Description" field on module settings page.

Regards,
ARI Soft
