Cloud carousel LIGHTBOX sliding mode/next picture?
Posted by gkar2000 - 2010/12/23 01:30

_____

Hi,

First of all congratulations on a great mod. Im using Joomla! v1.5, latest ARI cloud Cloud Carousel and rokbox plugin as lightbox.

Here is the problem: When I view the carousel and press one of the images of the carousel the lightbox displays the image. However I want to use the arrows left and right to skip/see next picture in the lightbox. This doesnt work because the lightbox doest see the images as a collection, only the pressed image. (rokbox does support the "next picture"function but it doesnt work together with cloud c)

-I've tried all light boxes all do the same, is there a way to get this working? Does the ARI sexy/fancy lightbox have this function?

_____

Hello,

"ARI Sexy Lightbox" and "ARI Fancybox" provides navigation between images in lightbox. You can see how "ARI Cloud Carousel" work with "ARI Sexy Lightbox" on our demo site.

Regards,
ARI Soft

That is greati have two more questions though,

Is the fancybox customizable? The lightbox color is black now in the demo but i need it to be white, size? Effects? Background overlay opacity?

And: if I buy the ARI fancybox do I get updates for free? Like a joomla! 1.6 variant?

_____

Yes, it is possible to set overlay background color, opacity, choose transition effect in module (or plugin) settings. If you want to change lightbox color, it is required to change CSS styles and images. Updates can be downloaded in "Member Area" on our site during a year after purchase.

Regards,
ARI Soft
