Configuration of Core Joomla Lightbox

Posted by kalte - 2010/12/25 16:33

_____

Hi,

I recently installed the Carousel and I am really impressed, thanks for your work. However, I have choosen to use the Core Joomla lightbox for displaying the large pictures and I do not know how to change e.g. the size and the border width. The configuration in the Carousel settings (x,y size) seem not to have any effect.

Thanks a lot

Heiko

_____

Hello,

You can use the following CSS rule:

```
DIV#sbox-window
{
 /* border color */
 background-color: red;
 /* border width */
 padding: 5px;
}
```

Place this code into site template CSS file.

Regards,
ARI Soft
