[Suggestion] : incorperate descriptions/title/link
Posted by gkar2000 - 2010/12/28 14:22
_____

Hi ARI and readers,

First of all I have installed the ARI Cloud Carousel and am very pleased with it. If you wat to make the most out of the carousel be sure to buy and install an ARI highlight box too, they look great and the service is outstanding. that being said I have a suggestion for the ARI Cloud Carousel.

The description and title .ini file script is very clear for me but if you want other people maintaining the carousel descriptions with less skills it should be incorperated in the admin screen. So instead of typing the directory where the images are at make a loader they which loads the images in thumbnails into the admin screen. Now you could make a simple description and title and link bar where a computer not can edit/enter descriptions. Multi lingual is now also automaticly put into it as Joomfish or other translation scripts do the translation as they traslate per module.

Once again for me it works fine but for the 'normal people' or not so skilled programmers it is too difficult.

Thanks for the great support and great product i can recommend ARI products to all.

Demo: http://www.whitelabelcoding.net/glamorous-fashion/

Hello,

Thank you for your suggestions. We will respect them and improve process of creating descriptions and titles in a future release.

Regards,
ARI Soft

I've been working with the cloud carousel now for a little less then a month, definatly needs the above. I keep needing to update small bits and pieces of title/description which I want other peopke to do. I don't have a big purse but maybe even willing to pay something to support you to have it added. contact me @ contact@leanwebdesign.net

Here is a workaround - but it works.
IMPORTANT Note the SINGLE quotes inside the double quotes or it wont work.

107537voip.jpg="My Superb Product"

107537voip.jpg="My Superb Example Product Description."

107537voip.jpg="index.php?option=com_k2&view=item&id=3:voip-basic-service&Itemid=73&lang=en"
