[Suggestion] Style change: Navigation flipping
Posted by gkar2000 - 2010/12/28 17:53

_____

Hi

I have another suggestion, I have styled the carousel, I put the < > nav arrows below the carousel. If you press them now however they will slide the photo's in the wrong direction :). I can change it myself now don't worry but for other users maybe the option to "flip navigation" will be better.

Here is the unflipped link http://www.whitelabelcoding.net/glamorous-fashion/

_____

Hello,

Described effect can be done if use ">" for prev carousel item and "
