## carrousel width question \"liquid\" mode?

Posted by gkar2000 - 2011/01/04 02:00

---

Hi,

Is it possible to set the carrousel to a 100% width percentage so people in all browser resolutions get a 100% width screenfill instead of a solid width number?

Hello,

The module doesn't support this ability, but we will think about implementation of this feature in a future release.

Hello,

"ARI Cloud Carousel" v. 1.4.0 provides ability to define width of carousel container in percent, for example, if you want to set it to 90 percent, enter "90%" in "Width" parameter. One note, the module will not change carousel width if a user resize window, it calculates real width when a page is loaded.
