## make LINK in .ini as a hyperlink to external

Posted by redcoder - 2011/07/28 10:44

---

Hi,

I am thinking to make the in .ini file as a hyperlink to external site...

how can I do that ?

Hello,

Place link to necessary page in section in INI file.

---

I did place the necessary link but no luck..

see my .ini file at [http://getlateholidaydeals.co.uk/modules/mod\\_arislickgallery/arislickgallery.ini](http://getlateholidaydeals.co.uk/modules/mod_arislickgallery/arislickgallery.ini)

---

INI file should be located in folder with images and use link in the next format:

```
osmbanner1.png="http://www.google.com"
```

It works now..

The key word is INI file should be located in folder with images

Thanks..

Hello,

The module doesn't support ability to show external images.

OK I have a dumb question what is a "INI file"?? Is it a text file? What I am asking is in what form do I up load it to the server?

Text?  
html?  
note pad doc?

Hello,

You can read about INI file format here. A link to a sample INI file can be found in "Description" field on module settings page. INI files can be created and edited in any text editor.
