problem with Lightbox integration
Posted by mizaz161 - 2011/10/23 23:13

_____

hi,

i chose core!joomla lightbox, it used to work great before but i dont understand why it does not follow the lightbox width and height now.

and some of my photos seem too small for that inappropriate lightbox, please have a look here:
phampl.us
and let me know what i should do,
many thanks in advanced!

_____

Hello,

Sorry, but modalizer extension is used instead of core Joomla! lightbox on provided page. We suppose modalizer replaces core Joomla! lightbox.

Regards,
ARI Soft
