
Images stacked!

Posted by Mar - 2011/10/27 02:15

Hi,

Great addition to my joomla page..... but the images (thumbnails) are all stacked one on top of the other!

Thanx

Jaden

Hello,

Increase values of "Width" and "Height" parameters in module settings.

Regards,
ARI Soft

:)
Sweeeeet! Works. Nearly!

I would like the images to be in a nice row and column layout instead of all over the page and on top of each other!
Selecting Random Position does not effect the layout.

Thanks so much for your quick reply. Looks and works great. Will bookmark you.
Thanks again.

Sorry for the delay. The extension shows images in random position. If you want to show images in table view, you can be interested in ARI Sexy Lightbox extension. It can show thumbnails in table view and display large images in lightbox.

Regards,
ARI Soft
