Ari Sexy Galery in an Article

Posted by carojara - 2011/11/05 21:19
_____

Hi!
I need to put a menu in my web page and I need that each item of that menu redirect to a gallery (in each item is going to be a diferent gallery).
I dont know if is possible to put more than one gallery on the articles. And I need to know wich is the maximun.

thanks!

Hello,

You can create as many module instances as you wish. You can read about it here. A module can be loaded into an article with help Content - Load Module plugin or with help Modules Anywhere plugin.

_____

Where exactly I should put the code:
{arisexylightbox moduleId=""}{/arisexylightbox}
Inside of the article? I tryed but it doesnt work

_____

For example if you want to load "ARI Sexy Lightbox" module with ID equals to 95 into an article, place the next code into appropriate article:

{arisexylightbox moduleId="95"}{/arisexylightbox}

Check that "System - ARI Sexy Lightbox Anywhere" plugin is installed and enabled and "ARI Sexy Lightbox" module which you want to load is enabled.

PS: If you use a WYSIWYG editor, switch it to plain text mode before inserting the code.

Regards,
ARI Soft

Thanks! that works perfect :)
I have another question. I would like to use the spanish Ñ• on the descriptions in the pictures. You have any tip for diferent languaje on the description. A weird symbol is in my description when I use the Ñ•

Thanks :)

_____

For example you can use Notepad++ editor for this purpose.
