
I need help with ARI Slick Gallery

Posted by Didimos - 2011/11/08 10:21

Hi, I need help with ARI Slick Gallery. An important feature doesn't work - moving of scattered photos.

On my webpage it doesn't work as it should, I mean as in ARI Slick Gallery demo.

Why is that so and how can I fix it?

Regards.

Hello,

It doesn't work because provided page contains javascript errors. It seems this problem with site template or 3rd party extension which is used to optimize loading of javascript and CSS files. We can investigate the issue in more details if you provide temporary access to your J! backend by email.

Regards,
ARI Soft
