## images not draggable - no lightbox opening

Posted by soyalala - 2012/04/12 18:20

---

hello,

I installed the Slick Gallery in my website and I can't have the images being dragged or opening in a lightbox. I deleted a lot of modules I was not using anymore and try to disable the JQuery library in some module to avoid 3rd conflicts module, but still nothing.

I can only have the images displaying randomly.

Any idea?

here is the link

<http://www.mtcdestinations.com/incoming>

please let me know what could be wrong,  
and if you need access to back ed , let me know, I ll send you login info asap

many thanks for your time

Hello,

This problem with superfish menu extension. It raises javascript errors, you can see it in browser error console (press Ctrl + Shift + J in FireFox browser).

ok thanks, So what I am supposed to do? you mean both extensions are not compatible?  
do you know how to stop conflicts between both?

many thanks

It is not compatibility problem, this problem with superfish menu. It doesn't load jQuery, but load scripts which are used jQuery and it causes errors. Contact superfish developers so they fix this problem.

ok I disabled the superfish menu and I see I can drag images now, thanks a lot,  
but still images are not opening in the lightbox, even thoug I selected ninja shadow box as I have it installed...  
thanks in advance...
