Slick Gallery .ini file for image titles

Posted by heehaw49@gmail.com - 2012/06/08 00:45

_____

I have created a .ini file in notepad and added the following text

Chico.jpg="Chico"
Annie_Bits_Foal.jpg="Annie-Bits & Foal"
Austin-Vinnie.jpg="Austin & Vinnie"
Austin.jpg="Austin"

Chico.jpg="A cockatiel"

I titled this arislickgallery.ini

I am not having any luck getting the titles to show up. Am hoping to add descriptions too.

BTW I really appreciate the module, other than this glitch it was very easy to use. I had purchased another of your modules in the past (sexy lightbox) and never figured it out. (I didn't contact you either). This was great.
Please let me know what other information you would need.

_____

Hello,

Sorry, but we can't open your site. Check it please.

Regards,
ARI Soft

_____

Where we can see a slider? Main page doesn't contain it.

Regards,
ARI Soft

_____

I'm beginning to feel like an idiot. The slider - where I want to use names and descriptions is the photogallery.

_____

http://juliethepetnanny.com/ page doesn't contain "ARI Slick Gallery" module. Where we can see the module on your site?

Regards,
ARI Soft

_____

the following is the url to the page where I used the picture module. the site owner really wants the names and descriptions on the pictures. She also doesn't want the pictures in a formal format - she really likes that they are "tossed" on the page.

http://juliethepetnanny.com/photo-gallery

As I said in my first email I set up the .ini file like you described in your directions. Did I miss something important?

Chico.jpg="Chico"
Annie_Bits_Foal.jpg="Annie-Bits & Foal"
Austin-Vinnie.jpg="Austin & Vinnie"
Austin.jpg="Austin"

Chico.jpg="A cockatiel"

LeRoy o Lab Coonhound Cross.jpg="LeRoy"

LeRoy o Lab Coonhound Cross.jpg="A lab coonhound cross"

I put this page in my images/photogallery file
I left the name arislickgallery.ini the same as is in the module.

What am I missing????? Thanks Sandi B

_____

Try to use the next content in INI file:

Chico.jpg="Chico"
Annie_Bits_Foal.jpg="Annie-Bits & Foal"
Austin-Vinnie.jpg="Austin & Vinnie"
Austin.jpg="Austin"

Chico.jpg="A cockatiel"

Regards,
ARI Soft

_____

The description still doesn't show and it doesn't show in the lightbox but at this point I can work with what I have. Thank you for all your time and effort. TBH I envy you and all the other people that are so talented to write code for modules, components and plugins for Joomla (or for any other programs) Thank you.

_____

"Core Joomla! lightbox" doesn't support ability to show titles and descriptions so they doesn't show into the lightbox. "ARI Slick Gallery" shows only titles under thumbnails, descriptions can be shown into a lightbox if it supports by the lightbox which you use.

Regards,
ARI Soft
