
No [sexy] lightbox :(

Posted by zambala - 2012/08/13 13:53

Hello,

I could not integrate it with sexy lightbox...:(

I get thumbnails and can drag them, but there doesn't seem to be any lightbox even I set the integration in settings...

I am inserting it in k2 extra field via "modules anywhere"

"ARI Slick Gallery" can be integrated with "ARI Sexy Lightbox" extension. It doesn't support integration with "ARI Sexy Lightbox Lite" plugin.
