## HOW DO I DISPLAY IMAGES

Posted by phil2564 - 2012/12/20 15:17

---

I have ARI SLICK GALLERY installed in Joomla 1.7 can someone explain the code on how to display images using ARI SLICK GALLERY. What is the display code I need to write into my Html page.

Hello,

"ARI Slick Gallery" is a module and it is used as other Joomla! modules. Enable the module, select module position where you want to show the module (module positions are predefined in site template), select pages on what you want to show the module and configure module parameters. Enter path(s) to image folder(s) in "Image path" parameter in module settings. Each parameter contains a tooltip with description.

If you want to embed the module into an article, you can use "Content - Load Module" standard Joomla! plugin. You can read more about it [here](#).

Regards,  
ARI Soft
