
Slick Gallery - thumbnails not draggable. Static

Posted by THUTO - 2013/03/22 21:14

Please let me know what is going on! Thumbnails are not draggable and the layout is 'stuck' to the left of the window.

Hello,

An incorrect CSS rule is used on the page. Open HTML source of the page and you will see the following code:

```
input.button {margin:0 50 0 50 !important; background: #c90000; !important; target="_parent; }
```

It is an incorrect code. Fix it and use the following one:

```
input.button {margin:0 50 0 50 !important; background: #c90000; !important; }
```

and also increase value of "Width" parameter in module settings.

Regards,
ARI Soft

This problem with extension which adds the following javascript code:

```
document.ondragstart = function () { return false; };
```

I don't know how to fix this:

This problem with extension which adds the following javascript code:

```
document.ondragstart = function () { return false; };
```

It can be an extension which "protects" content.
