
Connecting to folders

Posted by homecook - 2016/02/07 15:38

Hi there,

I have just installed ARI Slick Gallery for my web page, i have some Trouble connecting to the folder where my pictures are located.

This is what the system tell me.

Warning

JFolder: :files: path is not a folder. Path: Images/Billeder/Divaerne/crawler

This I don't understand, this is folders, Images (the root folder) / Billeder (main folder for pictures and Sub folder to Images) / Divaerne (Sub folder to Billeder) / crawler (Subfolder to Divaerne)so I have made the Path clear for the module

I hope you can tell me how to specify the path so the system works :(

Regarts

Hello,

Path to folders are case-sensitive. Check that root folder is really "Images" and not "images".

Regards,
ARI Soft
