How to make the images dragable as in the demo
Posted by Doug - 2010/09/05 14:43
_____

I like this extension and would like to use it on my site. After installing the extension, however, the images are not dragable. I have checked the configuration, but there does not appear to be a way to turn this on. Any help would be most appreciated.

Thanks!

Hello,

Could you provide link to page where we can see this issue? Images should be dragable by default. It can be conflict with a 3rd party extension.

Regards,
ARI Soft

_____

It seems /modules/mod_arislickgallery/mod_arislickgallery/js/jquery-ui.js file is corrupted. It should has size 112877 bytes, but on your site it has size 112820 bytes.
