Problems making descriptions and titles appear

I am having a problem making the descriptions and titles appear on my images. I love this module and the interactivity that comes with it, I just really, really need the titles and descriptions on each photo. If anyone can help me get this remedied, please help.

Here is a copy of my ini file that I set up. As far as I can tell I am using the proper format for the ini file as was placed in an example ini provided with the module.

Hello,

Could you provide temporary access to your Joomla! backend by email that we can investigate this issue?

Regards,
ARI Soft

Hello,

This problem occurred because you place CSV in incorrect folder. It should be located in folder with images.
