_____

How put ARI Slick Gallery in content?

==

Re:ARI Slick Gallery

Posted by admin - 2011/01/06 09:15

_____

Hello,

"Content - Load Module" standard Joomla! plugin can be used for this purpose. Instructions how to use it can be found here. In brief, check that "Content - Load Module" plugin is enabled, then open module settings page, type new unique position in editable "Position" drop-down, for example type "gallery1", set "Menu Assignment -> Menus" parameter to "All", enable module, configure other settings and save them. After this place in an article the following code:

{loadposition gallery1}

_____

Hello,

Enter path to images in "Image path" parameter. For example if images are located in /photos/album1 folder, set the parameter to photos/album1 value.

Regards,
ARI Soft

_____

Could you provide a link to a page where you try to use the extension and temporary access to your J! backend by email so we could investigate the issue?

Regards,
ARI Soft

Screenshots can't help because we don't files and folders structure on your server. Could you provide a link to a page

where you try to use the extension and temporary access to your J! backend by email so we could investigate the issue?

Regards,
ARI Soft

Sorry to bother...
I have read this over and over and been at this for an hour...
I just can't seem to get it to go...
Any chance you could help me out here?

ARI Cloud Carousel
Posted by JeZz - 2012/07/27 19:12
_____

Hello!

I'm from Mexico.I'm using the module ari cloud carousel, all was ok until I tried to add it into an article. The problem is the folder path.

I'm using the Joomla plugin (Content-Load Modules).
The module show me this message:

"JFolder: :files: Path is not a folder. Path: home/a6929798/public_html"

And this is my path: "images/Construccion_thumbnails/"
Like I said previously, it only happen when I add the carousel into a article.
Can you help me please? I don't know what's wrong.

_____

Hello,

We can investigate the problem if you provide a link to a page where we can see it and send a temporary access to your J! backend by email.

Regards,
ARI Soft

_____

Hi, I am running into the same issue as described in the post:

jm is my Joomla install, images are in Winter2103 folder and I have tried many different path combinations and still received the same error. I can view all of the images in a browser by appending jm/images/Winter2013/XXX.jpg, it is not a permission or location issue ...

JFolder: :files: Path is not a folder. Path: jm/images/Winter2013
JFolder: :files: Path is not a folder. Path: public_html/jm/images/Winter2013

Any hints/help would be greatly appreciated.
