
3 x ARI Orbit Slider on 1 page does not work in IE

Posted by communicat - 2011/05/12 15:16

Hi,

I want to use ARI Orbit Slider 3 times on 1 page. This works fine in FireFox and Chrome, al 3 rotate pictures from their file.

Only in Internet Explorer this does not work, only 1 slider rotates automatically while the other 2 freeze 1 picture.

Does anyone know how to fix this or is this even possible?

Any help would be greatly appreciated!

Hello,

Provide link to page where we can see the problem.

Regards,
ARI Soft

Set "Show timer" parameter to "Yes" for all modules.

Thank you so much! The parameters were set to 'auto'. I can't believe I didn't see this.

Everything works fine now.
