
orbit slider style.css typo

Posted by uilian - 2011/07/25 16:51

Thank you for this excellent extension.

I don't know if this is the best way to inform, but there is a typo on file style.css inside mod_ariorbitslider/js/themes/default (around line 32):

background: url(images/bullets.png) no-repeat; 0 0; width: 7px;

should be

background: url(images/bullets.png) no-repeat 0 0; width: 7px;

Best regards,

=====
