
orbit can\'t get it working

Posted by informatie - 2012/10/23 18:55

I do something wrong.

I have a photo folder

I have tried :

/images/Gazellen/Jubileum_50jaar/Feest/Foto

and

images/Gazellen/Jubileum_50jaar/Feest/Foto .

No action appears on the screen.

I attached 2 files with my settings.

Can you provide an examples. I looked at the demo code of your website but I'm still struckling.

Hello,

Use images/Gazellen/Jubileum_50jaar/Feest/Foto value for "Image path" parameter. If it doesn't help, provide a link to a page where we can see the problem and a temporary access to your J! backend by email so we can investigate the problem.

Regards,
ARI Soft
