
Many pages, Many Galleries

Posted by alperozgur - 2013/06/30 14:11

Hi;

I have 25 articles with their own galleries. Do i have to duplicate Orbit Slider for 25 times, or is there any easy way to solve my problem?

Hello,

If you want to use the same settings for the slider and change only path to image folder, you can use "Module Anywhere" or "Module Plant" plugin to load "ARI Orbit Slider" module and override "Image path" parameter. You can read more about it here.

Regards,
ARI Soft

Thank you for quick response. I'm trying Module Plant. But when i try to override the path parameter page cannot be load..

I asked to the Module Plant developers and waiting for response.

Hi;

The Module Plant team solved the problem and i used that plug-in in my page. They solved the problem really quick and fast as your team.

Today is my shock day... Two extension, two different team and both of them are the best support team that i seen....

Thank you.
