
Joomla 3.5 not loading

Posted by shriek - 2016/04/05 04:49

Hi. I just updated to Joomla 3.5 yesterday, had that problem that you fixed with the new module. All was well, but today I'm just getting the spinning logo. Site is at <http://www.metroheadshots.co.nz/>
I have include JQuery on and jQuery noConflict on, and have tried with those off and on, deleted all the cache files. pic path is at images/gallery
I saw some probs with swmenupro. Tried turning that off. No luck. Any ideas?
Site is with siteground by the way.
Thanks
Andrew

Hello,

The page doesn't contain "ARI Orbit Slider" extension.

Set "Include jQuery" parameter to "No".

Regards,
ARI Soft

Download and upgrade the module (just install the new version via Joomla! installation page). It should help to resolve the problem.
