
Can't make the Flipbook work

Posted by Pethol - 2011/03/10 12:16

Hi,

Just bought this thing.

I activated the plugin and created an article and a module. In the article I put the line: {ariflipbook moduleId=""}

This should call the Arimodule, which I set up for the purpose.

All I get is this: http://expressokid.com/index.php?option=com_content&view=article&id=60&Itemid=2

What I want, is to show all article in a category(a blog) and show the blog as a "book".

Hello,

Use the next code:

```
{ariflipbook moduleId="74"}
```

Check that "Content - ARI Flip Book" plugin and "ARI Flip Book" module with ID equals to 74 are enabled. If you don't want to show module in site template module position, just set "Menu Assignment -> Menus" parameter to "None".

Regards,
ARI Soft

Module: Enabled, ID 74
Plugin: Enabled, ID 61

And thanks for the tip. The module has already been assigned to "none" :)

I have prepare backend-access for you if you need it.

Thank you, but unlock "Blog" module and "Main" article please because we can't open it for editing. For this open module settings page (article edit page) and click "Cancel" button in toolbar.

As we wrote in this post the code for loading the module should look like {ariflipbook moduleId="74"} instead of

{ariflipbook moduleId=""}

Regards,
ARI Soft
