Using the Flip Book

Posted by tariq - 2011/05/02 13:59

_____

Hi there,

I love the flipbook module however i'm really not sure how to use it.
I was wondering if you could point me in the right direction.

My website is: bespokewalls.com, I want to install it:

http://bespokewalls.com/our-medium.html (here)
http://bespokewalls.com/installation-instructions.html (here)

Also wanted to ask how do i create multiple pages? Would I have to create seperate articles or can I have all my content on one article and would the flip book auto insert the content.

If its in seperate articles, would i have to set up tables eg 800x500px and add the content there. or is it limited to 400x500px per page.

_____

Hello,

"ARI Flip Book" module shows Joomla! articles. Each selected article on new page in flip book. If you want to embed module into an article, it can be done with help "Content - ARI Flip Book" plugin. For example if you want to load "ARI Flip Book" module with ID equals to 53 into an article, place the next code in the article:

{ariflipbook moduleId="53"}{/ariflipbook}

PS: We can help to configure the extension, if you provide temporary access to your Joomla! backend by email and say what articles do you want to show into flip book.

Regards,
ARI Soft
