
Internal page navigation

Posted by hry - 2011/08/21 21:36

Hello,

I have a couple of days that I'm trying to set up a new site based on flip book component. I think that it would be useful if there was an option to navigate internally to a specific page. eg if it was possible to assign a specific page to a menu item. Is there any way to do that? I've seen it again on other sites.

Thank you!

Hello,

Do you want to specify start page number in module settings?

Regards,
ARI Soft

No, I do not want to specify the start page, but I want to refer to a specific page inside the book. I found a solution about that by activating hash links...it seems that it works!
