Extend the height of the flip book
Posted by fhchan - 2011/09/03 10:14
_____

The content of the article extends below the bottom of the frame of the flipbook. In the module configuration the width and height of the content can be adjusted. Can the height of the flipbook be adjusted to longer as well? If yes, where to make the changes.
Fai.

Hello,

"Width" and "Height" of Flip Book can be set in module settings or you mean something another? Probably you can provide a screenshot where we can see what do you want to achieve?

Regards,
ARI Soft

... I got the same problem. I edit the size at the modul parameters high 600 and the "result" at the frontend is, that the content is larger than the "book". If I change the size to 400, the article fits into the book, but you canÒt read it, because itÒ'Ò's to small

_____

Could you provide a link to a page where we can see a book?

Regards,
ARI Soft
