Very Basic Flip Book Setup
Posted by SurfingFriendly - 2011/10/17 18:15

_____

Hi,

Looks like I am a complete idiot. I just got the ARI Flip Book, installed it (Joomla 1.7) as described, which means, I installed the extensions first, enabled them....
....nothing shows up. All I added to the article is:

{ariflipbook moduleId="80"}""""""""

and... nothing? Can anyone help me?

Best Regards
SurfingFriendly

_____

Hello,

1. Check that "System - ARI Extensions" plugin is installed and enabled.

2. Check that "ARI Flip Book" module with ID equals to 80 is enabled and configured properly.

3. Check that "Content - ARI Flip Book" plugin is installed and enabled.

4. If you use a WYSIWYG editor, switch it to plain text mode before inserting plugin code because WYSIWYG editors can add extra HTML code in design mode.

4a. If you see unnecessary HTML code, use the solution from this post.

PS: If nothing helps, could you provide temporary access to your J! backend by email so we could investigate the issue?

Regards,
ARI Soft
