Have ARI Flipbook any problem or with JRouter?

Posted by powertoart - 2011/10/26 13:59

_____

ARI FlipBook module correctly works, but it does not pick up any Joom!Fish Articles translation when the website language settings are different from default language. Is not a solution for this problem?
On the website on which ARI FlipBook turns I have not found any particularly dangerous components (Acojoom, JCE, MorfeoShows, QContats, RS Membership, Sh404SEF and Vemod NewsMailer), but a lot of files are outside Joomla! under Jumi that is not installed however (?!?); another webmaster started the website building and now I must solve several problems.
I would appreciate any advice!

Thank, Alessio

_____

Hello,

Is is possible to provide a link to a page where we can see the problem and provide temporary access to your J! backend by email so we could investigate the issue?

Regards,
ARI Soft
