
new book

Posted by skifbor - 2012/01/07 16:39

Tell us how to create a book? This was never written. Money paid, and no support.

Hello,

As we wrote previously, instructions how to use the extension can be found in readme.txt file and in "Description" field on module settings page. In brief, install and enable "System - ARI Extensions" plugin then install "ARI Flip Book" module and configure common module parameters (module position, menu assignment and other parameters which is used for all Joomla! modules). Then specify from what categories the module should show articles in book view. For this use parameters in "Source type -> Articles" section.

Regards,
ARI Soft
