
Error 500 Internal Server Error

Posted by CsiFa - 2012/02/21 21:19

Hej,

I've just purchased ARI Flip Book, but the plugin that loads the module in articles isn't functioning. The site is built up on Joomla 1.5.25 and hosted at redhost.dk.

Why do I get an HTTP Error 500 - Internal server error? Is it a permission issue?

Thanks in advance!
Csilla

Hello,

Try to add ID of article where you load the module to "Excluded article" in module settings.

Regards,
ARI Soft
