Memory Limit Error
Posted by igoodenough - 2012/04/21 16:22
_____

Hi.

Trying to get the Module/Plugin working but I keep getting the following error message:

Fatal error: Allowed memory size of 262144000 bytes exhausted (tried to allocate 483000 bytes) in /home/atlantic/public_html/libraries/joomla/document/document.php on line 433

I have tried upping the memory limit of the PHP file but it's not helping.

All plugin published.

Any ideas where I might be going wrong?

Cheers,

Ian.
