Zoom Capabilities

Posted by jgerald - 2012/10/16 13:46

_____

I am using Flip Book module as a simple Newsletter flip book. Does anyone know of a way to provide a zoom feature for the user while viewing the Flip book content. In my case I am using images for each page that have been converted from a pdf file.

Thanks for any help.

_____

Hello,

It is possible to use ARI Magnifier in articles which is used by "ARI Flip Book" extension.

PS: "Overlay links" parameter should be set to "No" in "ARI Flip Book" module settings.

Regards,
ARI Soft

_____

I have now purchased the ARI Magnifier and cannot get it working on my Flip Book.

My Flip Book is a simple Newsletter made up of Articles with just a jpeg in each article. Nothing complex. I just want to be able to give the use the ability to Magnify the content since it is so small. I have noticed that since I installed the Magnifier Module it is showing a entry at the bottom of the page(see screen shot). Can you please help me with this?

Thanks

_____

Do you use "ARI Magnifier" module or plugin? If you use the plugin, what plugin code do you use? It is possible to see the problem?

_____

I installed both and tried configuring the module. It is putting {empty text} at bottom of page. Should I turn off the plug-in? Not real excellent with this so any help is great.

_____

If you want to use the extension in flip book, it is necessary to use "ARI Magnifier" plugin in article(s) which are shown by "ARI Flip Book" module or embed "ARI Magnifier" module to article(s).

_____

Is it possible to contol the amount of Magnification? The zoom is working well now as a plug-in and I am able to control the size of the zoom window but is there a way to control how strong the magnification is?

Thanks

_____

It is not possible. Magnification is based on proportion of original image and thumbnail.
