Flipbook Returns Author Email Address String

Posted by sbrant - 2012/10/25 18:44
_____

Joomla! 2.5.7

I've embedded a flip book module in an article using the supplied syntax or {ariflipbook moduleId=""}

236 is the module ID.

I added a menu item and linked it to the article. On click, a new page loads with this sequence:

1. Template attempts to load - background shows
2. Page goes to white with one line of concatenated email addresses from the article authors. like this:

myname@mysite@myname2@mysite2@myname3@mysite3.com

I don't want the domain public. Please let me know who to PM if you need further information.

Hello,

Disable "Content - Clock Email" plugin.

Regards,
ARI Soft

I have no clock email plugin. Do you mean email cloaking?

_____

Yes, this is standard Joomla! plugin.

Regards,
ARI Soft

_____

Nothing. The plugin uses deprecated javascript code.
